NORTH SHORE

* ART THERAPY

Art Therapy is a mental health approach in which a person uses art materials, and the process or art making to explore feelings, thoughts and memories, reconcile emotional conflicts, reduce anxiety, and increase self esteem and self awareness. There is no need for art skills, since the emphasis is on the creative process and the meaning that a person is making of it, rather than on the final product. Images and symbols can help us to understand ourselves and improve well being through self expression.

See website for more details.
